

Les Pierres d'Aurèle

Presentation and Philosophy :

"The vineyard of 20 ha extends over two large soils typical of the region of Chenonceaux.

- *13 ha surround the estate, on a stony soil of Clay to Flint*
- *7 ha are located 3 km from the estate, on a ridge of sedimentary sand deposited by the Cher to the Tertiary Era ..*
- *These soils gave their names to the four "cottages" that line the vineyards closest to the building.*

And to guarantee the sustainability of our practices, the vines are grown according to the Terra Vitis® production charter. The vines are grassed all year long and each of our interventions comes from a careful observation of the vineyard. We do not use insecticide and anti-rot and we regularly analyze our grapes to guarantee the total absence of treatment residues in our wines."

The wines of the winery (Selection) :

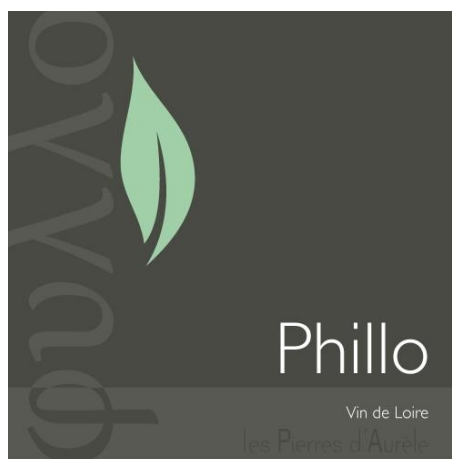

- **Phillo** : *'Ripe and refined notes of citrus, peach, pineapple and passion fruit. Its fleshy mouth will give way to a fresh, aromatic and gourmet finish "*
- **Pyros** : *"The palate is concentrated, full and fleshy. There are subtle notes of blackberries, blueberries and violets with an intense spicy finish. "*
- **Chrysos** : *"Its bubbles, fine and delicate, exhale aromas of citrus and white flowers. Its mouth, more mineral, will leave an aromatic finish with hints of peaches and white-fleshed fruits. "*
- **Aeras** : *"Its fruity nose, with intense aromas of raspberries and cassis, is delicately supported, in the mouth, by a fine and elegant bubble. Its long and gourmet finish will delight the taste buds of expressive and fruity wine."*

Our Wines

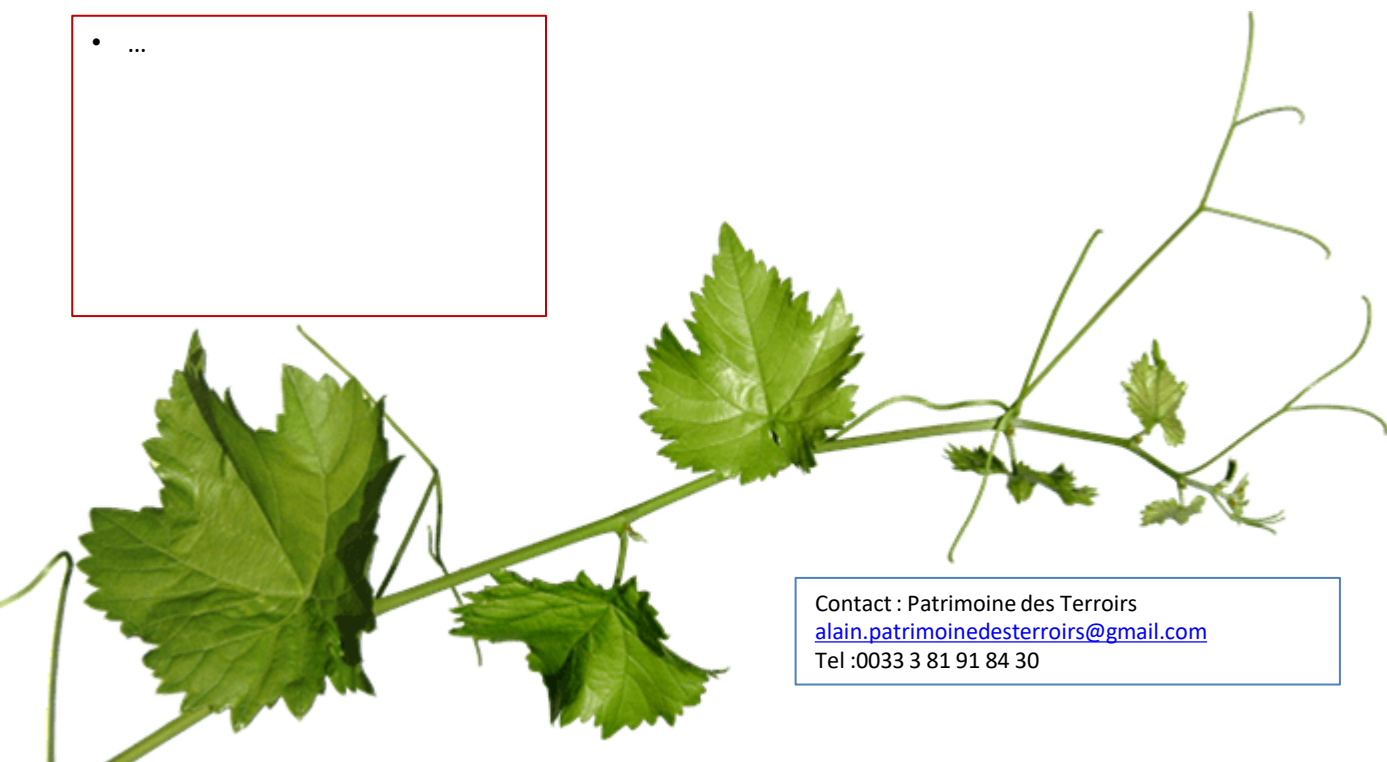

- AOP Crémant de Loire Chrysos
- AOP Crémant de Loire Aeros Rosé
- Aurele Bulles Vin de France
- AOP Touraine Vingt Mars
- AOP Touraine Chenonceaux Phillo
- Vin de France Aurele
- AOP Touraine Petra
- AOP Touraine Pyros
- AOP Touraine Nouvelle Lune
- AOP Touraine Chenonceaux Aurele
